Myers produces some of the most effective mixing equipment in the world such as high speed, high shear mixing and dispersing units used in primary industries like paint, ink, adhesive and sealants, rubber, electronic and other composite materials, food, personal products, and many more.

- Agitators
- Single Shaft Dispersers
- Dual Shaft Mixers
- Multi Shaft Mixers
- Tank Mounted
- Ram Press
- Lab/Small Production Units

Premier Mill milling equipment for the paint, ink and coating industries, pharmaceutical, chemical, food, and adhesives.

- Sub-micron & Nano Milling
- Low and High Viscosity Materials
- Single-pass & Multi-pass
- High-flow Recirculation
- Media screen separator configurations for complete range of grinding media requirements

High quality sieves, straining and filtration equipment and systems for many industries including food, pharmaceutical, paints & coatings, ink and powder metals. Also used for quality control check screening of powders, liquid straining, product reclamation, and particle size separation.

- Center-discharge Units
- Multi-level Side-discharge Units
- 22", 30", 36" & 48" Screen Diameters
- Stainless Steel Contact Points
- Ultra Sonic Deblinding
